 I love the game so much! but..... Please fix this "known" ics crash when using the back button please. I'm a gigantic stepmania fan and would love to go stupid with stepfiles on my phone but this is kind of game breaking for me. Would really love to see a fix. Otherwise thanks for the amazing game.

Good game My Nook Color running CM7 doesn't seem to need an OGG offset, interestingly. (also, I set the music sync to +0.150, in case it helps anyone)
